16 October, 2003

Dear Sir or Madam

Thank you for the filing receipt related to the above-mentioned application. I have recently submitted corrected application papers in accordance with directions you supplied with the filing receipt.

This current letter and the enclosures relate to preliminary amendments I wish to make on my own initiative. Under 37 CFR 1.215 (d), if you have not started the publication process related to my application, you may include the proposed amendments in the patent application publication. Indeed I respectfully request these amendments to be accepted and included in the patent application publication.

In addition to the amendments, I enclose a complete copy of the application including drawings for the purposes of 37 CFR 1.215. This copy includes the amendments but is otherwise the same as the corrected original application.

Thank you for any service you may give.

Yours faithfully

Russell Zelany Christensen
